DEPARTMENT OF COMPUTER SCIENCE

LETTER OF RECOMMENDATION

I have known Mr. Muhamad Rashid since 2017 as a graduate student in Computer Science. I taught him three courses in graduate related to Digital Image Processing. He performed very well in these courses. As a graduate student, he is curious about different algorithms. We also had many interactive sessions for three semesters.

He also opted for his MS research/thesis under my supervision, and it took one year to complete this research/thesis. He started his research work in the third semester and formally enrolled it as a thesis in the last semester to complete it. His research is focused on "Object Detection and Classification Based on Feature Fusion and Deep Convolutional Neural Network". During this research, he published the research article in the Q1 journal under my supervision. Furthermore, he also assisted me in undergraduate teaching by grading class assignments, quizzes, and semester projects.

During his whole interaction with me, he proved himself a hard worker as well as a dedicated student. He has good working habits. He has excellent abilities to work in an integrated environment as well as individually. I can safely say that he has sound knowledge and has excellent capability to grasp new ideas and concepts. With these qualities, he is cooperative, polite, and punctual. He has good communication in both written and oral as well as his presentation skills are impressive. He is quite capable of pursuing research at the Ph.D. level. I highly recommend him for further study and research at your prestigious university.

Dr. Muhammad Sharif
Associate Professor/IEEE Senior Member
